## **“Green” is a new color for Tuscarora Yarns**

Fresh on the heels of the Outdoor Retailer Show in Salt Lake City where the buzz words were “green”, “organic”, “recycle” and “sustainability”, Mt. Pleasant, North Carolina based Tuscarora Yarns announces its established range of ecologically friendly yarns. Tuscarora has produced a recycled cotton based product “Remade™” for over 20 years for the upholstery market, now Tuscarora moves beyond recycling by producing environmentally friendly and health conscious products.

Prominent amongst the range are:

### **Sustainable yarns produced from**

- USA organic cotton fiber
- “Bambu” from natural bamboo fiber
- Ingeo™ corn fiber (Licensed spinner).
- Flax fiber
- Recycled post consumer waste polyester fiber, ‘Ecospun™’ and ‘Naturespun™’

### **Antimicrobial yarns produced from**

- Fosshield® polyester
- Invista™ Fresh FX™
- Nanohorizons SmartSilver®
- Cupron™ copper fiber
- DAK Americas Delcron® HydroPur with AlphaSan®

Tuscarora brings its unique blending ability to combine these fibers in a vast array of yarns for apparel, hosiery, home furnishings and medical applications.

Simultaneously, these innovative yarns, will meet present and future business and consumer requirements without compromising the Earth’s fragile environment. Businesses today face marginal parameters when balancing consumer demand for new and improved life styles. With the concern for conservation of natural resources for future generations, Tuscarora Yarns pledges its commitment to the availability of eco friendly and sustainable fiber yarns.
